	chance common fraternal identical triplets
	A mother gives birth to Maria and Martin together. They don't look alike. They are twins.
2	A mother gives birth to Tina, Gina, and Nina together. They are
3	A mother gives birth to Bob and Rob together. They look the same. They are twins.
4	Fraternal twins are more than identical twins.
5	The of having triplets is 1 in every 625 births.

Listen, read, and circle. Which animal can have the most babies at one time?

Some scientists say the chance of having 'fraternal / identical quadruplets is only 1 in 13 million. Not if you're a nine-banded armadillo! These armadillo moms give birth to up to 56 pups in their lifetime. And every time they give birth, they have FOUR identical babies at a time. That means that an average armadillo has a record-breaking fourteen sets of ² triplets / quadruplets. That's impossible for humans and very ³ rare / common in the animal kingdom.

*Multiple / Single births are very common in the animal kingdom. Often, this is because not all the babies survive. Cats usually give birth to 3–5 kittens, and some dogs have 5–10 puppies. These little brothers and sisters look alike, just like brothers and sisters in human multiple births, but they are very rarely identical.

triplets

nine-banded armadillo

Other animals rarely or never have multiple births. Usually, 5 smaller / bigger animals have more babies and larger animals have fewer. Elephants have only one baby at a time. Whales almost always have only one baby at a time. These animals have a very different relationship with their offspring.

However, pigs are different. They are larger than other farm animals, but they have a lot of babies. Sometimes they have 20 piglets at a time!

	Look at 14 and choose the correct answer.	
Nir	ine-banded armadillos always have	
a	identical quadruplets. b	fraternal quadruplets.
Но	ow many times does a nine-banded armadillo g	ive birth in a lifetime?
a	up to 14 b	up to 56

- Lucy has a lot of friends.
- This is something I buy,
- These are big posters by the side of the road.
- This makes you want to buy something.

- It's a product.
- They're billboards.
- It's an advertisement.
- d She's popular.

Listen, read, and circle. What do children love?

Advertisin

and happy life

When big companies are going to make an ad, they use four things to make us buy.

For cereals and different foods, they create a cartoon 'character / person. Children love cartoon characters. When children see them, they want to buy!

For products like sneakers, coffee, and perfume, they choose **'famous / well-known** actors and athletes. We like to buy the things that these people use.

Companies use other ***tools / tunes** for selling, too. Things we can read or hear. For example, they use "slogans / advertisements. They're catchy phrases we can't forget when we think about a product.

Companies also use images with bright / attractive colors and great photos. Exciting billboards help sell products because they catch our ⁶eye / nose and make us think about the product.

Look at 15. Read and write.

forget buy cereal images

- Cartoons help sell ______ to children.
- We like to _____ the products athletes use.
- When a slogan is good, we can't _____ the words.
- _____on billboards help sell products. 4 Eye-catching _

About Germs

We try to stay healthy. but there are tiny $_{-}$ all around us called germs. They're always there, but we can only see them with a 2_ Unfortunately, they can cause

Where Are Germs?

They are everywhere. In the air, on old food, in ___, and on everything we touch with our dirty hands: the sink, the bathtub, our _. the TV remote control, and our computer keyboards.

Germs

Kinds of Germs

There isn't just one kind of germ, there are at least four. Each one is a little different. The main ones are bacteria, viruses, fungi, and protozoa.

How Do We ___Ourselves?

We can wash our hands often and keep the house When we have a cold or a cough, we should use tissues. Also, we should stay at home, so our germs don't

-	1

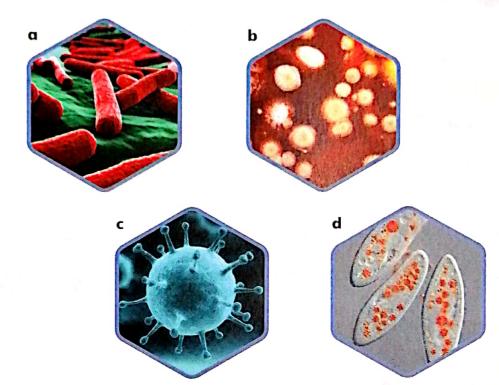

Look at 13. Answer the questions.

- How many kinds of germs are there?
- Can germs make us sick?
- Write three ways we can stay away from germs.

How did I do?

Match. Look at page 50 of your Student's Book.

- virus
- bacteria
- fungi
- protozoa

- Write germs 1–4 from 15 next to the information. Use the text on page 50 of your Student's Book.
- They grow on old food.
- They live in dirty water.
- It's in the air and gives us coughs and colds. 3
- The disease malaria comes from this.
- They're sometimes good and help us digest food.
- It can spread quickly through sneezes.

Culture Connection | Around the World

Read and \checkmark .

Ginger is used around the world as a home remedy for many different problems. For example, many people take it when they have a stomachache. In Japan, mothers give their children ginger tea with sugar when they have a cough or a cold. In Europe, people drink it in hot water with honey and lemon to help with sore throats.

Garlic is also a common home remedy. In Spain, people add it to their tea to help with colds and coughs. Some Native Americans put it on bee stings. It helps stop the sting from hurting.

Cinnamon is another common home remedy. Many people use it for colds, but did you know you can also use it to help with a toothache? Just mix some with honey and put it on the sore tooth. This not only helps the tooth hurt less, but also tastes delicious.

	bee sting	cold	sore throat	stomachache	toothache
ginger					
garlic					
cinnamon					

Read and match.

- A relaxing drink. Sometimes it's a home remedy for sore throats.
- When you rub someone to help them relax. 2
- Sleep is the best way to do this. 3
- When you have a fever, this makes your body feel cooler.
- You feel this before exams and during difficult times.

- rest
- herbal tea
- massage
- stress

	112						

What did people do before they had cars? Well, lucky people used to travel by horse and buggy. And unlucky people walked. Both forms of travel were 'uncomfortable / slow, but the horse and buggy was a little more comfortable. It had an average speed of 8 kilometers (km) per hour. Historians believe people didn't travel for longer than about three hours per day, probably because it was very *tiring / expensive.

Listen, read, and circle. How did people travel before cars?

Horse and Buggy

Mr. Henry Ford built the first Model T, or "Tin Lizzie", in 1908. It changed the way we travel. For the first time, a car was not a luxury. The car became a **popular** / **cheap** means of transport, and everybody with a job and some money could buy one. The Model T had an average speed of 40 km per hour. Suddenly, there were more vehicles on the roads, and it was more ⁴exciting / dangerous.

Today, there are many different smodern / new cars. Some are for racing, some are luxury cars, and some are family cars. They're all faster than they used to be. An average family car can travel at a speed of more than 150 km per hour. But they never do. The average speed of modern cars is 90 km per hour. This is because there are strict speed limits, and there is a lot of ⁶noise / traffic.

gi ZABAN

Œ	Look at 1 ^L	ł. Read	and	answer
			uiiu	answer

- 1 How many hours did people travel each day with a horse and buggy?
- Who could buy a Model T?

6 A modern car travels for 3 hours. How far does it travel?

____ x ____ = ____ km

Culture Connection | Around the World

Read. Then .

The Hmong

The Hmong are hill people. They live in the mountains of Southeast Asia. They have their own way of life and their own language. You won't find much modern technology in a traditional Hmong village because people there live the way their ancestors did 2,000 years ago.

The Maasai

The Maasai of Kenya are a nomadic tribe. This means they move from place to place and make new homes each time. Their villages don't have running water or electricity, so they can't use modern technology in their homes.

The Koryak live in the northern part of Russia's Pacific coast. Their land is Arctic tundra, and it's very cold. For food, they herd reindeer and catch fish. They also make some of their clothes. They wear warm hats made of reindeer skins to protect them from the freezing temperatures.

		The Himong	The Koryak	The Maasai

Read and write the answer.

Sam has to go to the dentist on the ninth of March. It is a regular checkup and cleaning. On the fifteenth of March, he is going to have his birthday party. His cousins can't come. So on the twentieth of March, he is going to visit his cousins. They are going to go to the movies.

- When is Sam going to celebrate his birthday?
- When is Sam going to visit his cousins?
- 3 When is Sam going to have his teeth cleaned?

Content Connection | Geography

Holi, The Festival of Colors

This festival takes place every year to 'watch / celebrate the end of winter and the arrival of spring. It's celebrated in India, Nepal, and other places. It's probably the most colorful festival in the whole world. During Holi, people throw water and colored 'paper / powder. People like to wear white clothes to Holi and watch them stain with all the different colors.

Tomatina, The Tomato Festival

Every year, on the last Wednesday of August, there is a **3clean / messy** festival in Buñol, Spain, where people throw tomatoes at each other. The festival started in 1945. There was no real reason for it. It was just good fun.

On the last weekend in November, the people of Lopburi, Thailand, invite hundreds of monkeys to a **4feast / fight** of peanuts, fruit, and vegetables. People come from all over the world to watch the monkeys eat.

Quyllur Rir'i, The Festival of the Snow Star

It takes place every year in May or June on a **volcano** / **glacier** in Peru. People celebrate with music and dancing for three days and nights, and the festival finishes with everyone carrying fire torches as they leave.

6	How does Quyllur Rit'i finish?	-,	= 1	

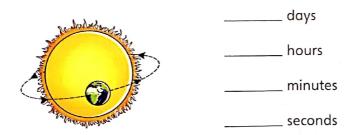

Culture Connection Around the World

Read about leap years.

→ C A X +		Q
	Leap	Year_

We usually say a year is 365 days long because that's about the time it takes for Earth to travel around the sun. It actually takes 365 days, 5 hours, 49 minutes, and 12 seconds. The extra 5 hours, 49 minutes, and 12 seconds add up to an extra day every four years on February 29th. This day is called leap day. Years with the extra day are called leap years. They can be divided evenly by four. For example, 2004, 2008, and 2012 were leap years.

- Answer the questions.
- 1 How long does it take Earth to travel around the sun?

- 2 How many days are there in a leap year? __
- Solve these problems.
- Billy was born on February 29th, 2000. Write the next four years he can celebrate his birthday on February 29th.
- 2 It's February 29th, 2012. It's Jessi's birthday. Write the next four years she can celebrate her birthday on February 29th.

Match the words to the pictures.

4 soccer **1** butterfly collection 3 embroidery 2 doll

a

Listen, read, and circle six mistakes. Then write the correct words.

china thread drawing employers rocking skirts

Many sports today are not new. Soccer became popular in the 19th century. Back then, many soccer clubs were started by teachers so that the workers could play and stay fit. However, only male workers could play. Soccer was a man's sport. Both women and men played tennis and croquet. Sports for women were not easy because they had to wear long trousers. 1_

Girls used to spend a lot of time at home. They did quiet activities with their hands. Many girls liked doing embroidery with a needle and rope. They used to embroider cushions and tablecloths. They also created beautiful pictures of flowers and birds with tiny colored stitches. 3_

In the 19th century, the choice of toys for girls and boys was much smaller. Girls used to play with dolls and dollhouses. They had to be careful because the dolls were made of plastic. They could break quite easily. Jumping horses were also popular with boys and girls. Boys used to play with toy trains and railways. 4_

People in the 19th century loved nature. One popular hobby was collecting and playing with butterflies. They caught the butterflies in nets then pinned them on boards to show their beautiful colors. 6_

Look at 10. Read and circle.

In the 19th century,

- many men played soccer in the park / at work.
- women used to play with trains / croquet.
- women went out / stayed at home a lot. 3
- women would embroider tissues / cushions.

Big English 2nd edition builds on the firm foundations and big ideas of the first edition and brings exciting new features and components to help young learners progress and communicate confidently.

Three academic pillars prepare students for the challenges they will find in today's world:

- CLIL motivates students to explore and enquire, by integrating meaningful content from other areas.
- 21st century skills empower students to get ahead in a changing world: collaborating, communicating, thinking critically and working creatively.
- Assessment for Learning develops the confidence students need to succeed in English and in life.
